Jet-Blasting

*Your commercial, industrial and mine site jet-blasting expert.
Providing the highest quality for your businesses needs.*

With sufficient, qualified, experienced and skilled staff, you can be assured that AQNP Solutions gets it right the first time every time.

AQNP Solutions use the latest equipment of certified brands and products on the market to ensure the highest possible standards are met and superior workmanship is delivered consistently.

We have the equipment and expertise necessary to complete any mine site Jet-blasting.

Vacuum Operation

We offer you a superior service which is guaranteed and our customer say our workmanship and equipment is far above the competition.

Our operation staff are honest, reliable and trained by the manufacturers. In addition, our well-maintained latest version of equipment will reduce the costs that you currently pay for the jobs.

We offer you our knowledge for even the trickiest jobs, and we will go that extra mile. We are fully conversant with the liquid waste and solid dust suction. This means Quality Equipment and Services!

AQNP Solutions can supply and operate vacuum trucks, vacuum tanks, vacuum pumps and motors for the liquid waste and solid dusts.

Sweeping Services

Our sweeping service can cover for road, undercover car parks and local pathways.

Street Sweeping Services for:

- Mine site dust control
- Major Infrastructure Projects
- Local Government / Regional Councils
- Quarries / Road Works / Asphalt Companies
- Developers / Civil and Building Contractors
- Maintenance Sweeping of major Roadway Assets

Car Park Sweeping Services for:

- Schools
- Universities
- Factories
- Shopping Centres
- Undercover Car Parks

We provide road suction sweepers to local and regional councils, developers and for contractors of major infrastructure contracts, also available for casual, short term and long term hire including driver.

Skip-Bin Operation

Our waste disposal service focuses on providing affordable bin hire and driver to industrial customers on site. Our skip bin operation is focused on recycling of process materials spilt on-site to reduce its financial impact and environment issues.

We have a variety of bins sizes available from 2 cubic meters to 6 cubic meters with variable materials (Stainless, Carbon steel, PP-lined) which can cover high corrosive materials to be transported safely.

We provide on-site waste transport services and skip bin hire in QLD at a competitive price.

Scaffolding

We are fully accredited with three level skilled scaffolders (beginner, Intermediate, Advanced) and offer a turnkey solutions to supply you the right products and labours to suit your needs.

Our scaffolding is very flexible to suit your specific requirement if you need to go higher or wider.

We only use high quality materials to guarantee our safe operations without high extra costs.
